### Narrative

Called to location for a P.N.B. female, dispatch stated that it was a possible "F" frank. Upon arrival found 41 Y.O. female lying face down in bed, rigidity and pooling of blood in the face and left side. Pt placed on HM and showed asystole in three leads. Med control contacted with no further orders. Pt has a history of depression and had taken medication for it. All pills were accounted for in the prescription bottles. Only three of ten

• were missing from an Rx filled yesterday. P.D. on location took control of scene and medical examiner contacted.

12/03/98 6:38 PM

On this date I responded to the scene of a reported person unconscious and not breathing. Upon my arrival I entered the house with a police officer coming in shortly behind me we were directed to the rear bedroom, by the husband of our pt., who also stated that his wife was taking a sleeping pill and an antidepressant. When I entered the room I found the pt. lying on the bed on left lateral side, covered with her blankets in a semi-fetal position. At that time I noticed that the telephone was off the hook. Which I placed on the base while in view of the officer. I then went over to the pt. and checked for a carotid pulse and felt none. I then moved the covers off of the right hand and again check for a radial pulse again I felt nothing. At that time I felt the arm which was cold, appeared to be stiff and in rigormortis. At that time I waited for 5641 to arrive and confirm her state.
